

Event Title: Prompt to Product (AI Prompt Challenge)

Tagline: Imagine. Prompt. Create.

Overview

“Prompt to Product” is an exciting AI-based event that challenges participants to use the power of prompt engineering to produce the most creative, accurate, or useful AI-generated outputs. Whether it’s generating text, images, music, or code, participants will have to think strategically and creatively to craft prompts that guide AI tools toward impressive results.

Team Size: Individual or pairs (1–2 members)

Eligibility: Open to students from all disciplines.
No prior experience in AI required.

Theme & Challenge Format:

A problem statement will be given at the beginning of the event.

Participants must engineer prompts and use AI tools to generate outputs (text, code, images, etc.) that address the problem.

Submissions must include:

1. The prompt(s) used
2. The AI-generated output
3. A brief explanation (100–150 words) of why the prompt was designed that way and how it solved the problem

General Rules

1. Participants must use mentioned AI tools only. (Will be given during the event)
2. Only AI-generated content will be evaluated.
3. Manual edits or enhancements after generation must be clearly mentioned.
4. Plagiarism or use of copyrighted data will lead to disqualification.
5. Each team can submit only one final entry.
